

VILLA HID IN CAVE FROM PERSHING

Spent Five Weeks in "Hole" in Mountains—Was Wounded and Had Leg Broken

SAW U. S. SENTRIES NEAR

San Pedro, Coahuila, Mex., Aug. 12.—Francisco Villa, surrendered bandit of northern Mexico, was in a talkative mood yesterday.

Choosing the veranda of the ranch house of Madero el Cuatro, near here, at the conclusion of a dinner where he and his more prominent bandit aides were the conspicuous guests, the ex-chiefdom occupied more than an hour in which he elaborated on the police now deems expedient for himself and associates to pursue and hold his bearings in the mountains, the ex-chiefdom which kept him safe from capture at the hands of the Pershing punitive expedition into Mexico in 1918.

He took occasion also during a further reaffirm his concern of Mexico first by refusing interviews with American newspaper correspondents and then by refusing to answer questions put to him by American correspondents, declaring that he knew "much money would be made from the interviews and films" and preferred that his countrymen of such pursuits might be disappointed.

His wound and suffering, he said, came to him in the midst of his efforts to organize a great band of followers to attack the Americans. He declared he had picked 1200 faithful followers to accomplish the task of recapturing the city of Mexico from the hands of two, three, four and five men, all of which were dispatched throughout Chihuahua to spread propaganda intended to arouse a great uprising of citizens against the punitive expedition.

He was confident, he insisted, that he could have equipped at least 8000 of these recruits with rifles, the others to carry knives two feet long.

"I never left the state of Chihuahua while Pershing was in the country," boasted the chiefdom.

After being wounded twice in the chest, he fled into a cave in the mountains. The cave was located in the center of a perpendicular cliff which rose fifty meters from a brook on the level plain below.

Villa said he lived in this cave for five weeks, recovering from his injuries and often saw American soldiers on a hill-top, 200 yards across, the hill-top. He took particular pains to emphasize his success against certain of his enemies in Mexico. His favorite recollection in this connection was how he escaped death at the hands of a Huertista firing squad by five minutes through the arrival of a telegram from Madero ordering Huertista to send him to Mexico City.

Final dispatches sent into Villa and his men will probably take place at the small town of Tlahualilo, a railroad stop near the Chihuahua line, instead of Durango Gomez Palacio, where it has been previously announced the ceremonies were to take place.

Polish Delegates Leave for Minsk

Continued from Page One

considered that a date has been set for the evacuation of the city, is gradually moving away the important state documents, the packing of which began several days ago.

London, Aug. 12.—(By A. P.)—Progress for the Russians against the Poles on the southern front was announced in Wednesday's official statement from Moscow, received today. Wladawa, on the Bug, south of Brest-Litovsk, has finally been taken by the Soviet troops, while further southeast they have captured Vladimir-Volynsky, north of the Bug, north of the Gailan border. Further advances on their front nearer Warsaw also are announced.

"In the direction of Poles, fighting is proceeding for possession of the town of Mlawa. On August 9 we occupied the towns of Makov and Ciechanow. Further to the southeast we have reached the Orzysie river. Between the Narwa

and the Bug we are driving the enemy westward. Further south we are advancing on the river Narew.

"On August 10 we occupied the town of Radomir, and on the 9th, after fierce fighting, we occupied the town of Wlodawa. In the region of Vladimir-Volynsky we occupied the town of that name and are continuing to advance."

Johannesburg, East Prussia, Aug. 12.—(By A. P.)—Reports that Mlawa, an important city on the Warsaw-Danzig Railway, was taken by the Russian Bolsheviks on Tuesday and that Soviet cavalry was within rifle shot of Warsaw, the fall of which was expected today or tomorrow, were brought here yesterday by a correspondent of the Koenigsberg Allegemeine Zeitung.

"There have been no official dispatches indicating the Soviet armies have taken Mlawa, and most recent advice from the fighting area have shown the Bolsheviks to be some thirty miles from the Polish capital.

Americans, British and French fighting with the Poles against the Bolsheviks, is declared by the correspondent, who says the Bolsheviks have been the fiercest and "bourgeoisie, who should be exterminated."

FOES OUTNUMBER POLES FIVE TO TWO

Washington, Aug. 12.—(By A. P.)—Poles driving Warsaw are outnumbered "about two to one" by the Bolsheviks, according to a comprehensive report received today in official circles here, placing the ratio of strength of the Soviet army on the Polish front at 350,000 men. The strength of the Poles has been estimated at 140,000.

Soviet successes against the Poles, reported on the Polish front, the number of twenty-six, the official details assert, have been identified as facing the Polish army in the front line, with three divisions in reserve. In addition, ten cavalry divisions have been noted in active operation at the front with two such divisions in reserve.

Besides the thirty-nine infantry divisions reported on the Polish front, the Bolsheviks are estimated to have scattered in other parts of Russia twenty-five others, as well as two cavalry divisions.

Contrary to previous reports, General Sergius Kameneff and not General Brusiloff commands the entire Soviet forces on the Polish front. In an intercepted wireless dispatch sent recently from Moscow by the Soviet government the report that General Brusiloff, former commander of the Russian Imperial armies against Germany, was in command of the Soviet army, was characterized as "the mistaken, intentionally perverted line spread by European bourgeois agencies."

The wireless dispatch added that "there is not a single German officer in the whole of our army. It is unnecessary to state that the ranks of the Red army are always open to all persons irrespective of their nationality, who consider it their duty to fight for the cause of Communism against imperialistic violence."

British and French Split on Wrangel

Continued from Page One

report that the recognition was actually given three weeks ago, expresses surprise that a question of such moment should be raised at the Hythe conference.

"In some quarters there is speculation as to whether the French step had any connection with the note of Secretary of State Colby to Baron Avezzano, the Italian ambassador to the United States, on the Russo-Polish situation."

In this connection the Daily Telegraph remarks upon the rather belated appearance of the Colby note and says it might have had a better chance of being accepted by Great Britain if it had come months ago. The newspaper says it shares the feelings of America toward dealing with the Bolsheviks, but it adds, "The United States is on the far side of the Atlantic, and while she can perhaps afford to ostracize Russia, while Lenin and Trotsky control her destinies, Europe is kept quivering on the rack."

The Daily Chronicle, also commenting on the Colby note, says: "In view of the abortiveness of America's attendance upon the Versailles conference, this decision is of less weight than it would otherwise have been."

The Daily News compares Italy's "progressive view" with America's "attitude of nicely poised passivity," and expresses preference for the former.

Paris, Aug. 12.—(By A. P.)—The recognition by France of the South Russian Government of General Wrangel, which appears to have created something of a commotion in London, is commented upon today by all the French newspapers, the majority of which express surprise at the statements Premier

Lloyd George made in the House of Commons concerning it.

They take the view that the British premier is not in a position to reproach France in connection with this initiative by her, advance notice of which was given by Premier Millerand in his speech of July 20, as they point out that Mr. Lloyd George himself began negotiations with the Bolsheviks without consulting France or the other Allies.

The newspapers consider that the French recognition of General Wrangel is a strictly logical continuation of the line of policy publicly mapped out by the French Government.

"The Crank" Is Taken to Norristown Jail

Continued from Page One

that Pasquale boasted in a cheap bar-room that he was playing a lone hand, that he did not have to divide the "swag" with any one, and I believe, much to do it, that Pasquale murdered the baby, and that he is now being because the electric chair is looming up before his eyes.

So strongly did the captain feel about it that he showed some elation as he placed Pasquale in the automobile for the trip yesterday to Egg Harbor.

"You have been lying to us long where the baby is being concealed; things are going mighty hard with you," Assistant District Attorney Hendricks is preparing information to swear out before Magistrate Clark, of Norristown, with a view to holding Pasquale for the grand jury's action in the next term of criminal court in Norristown, September 13.

MYSTERY MAY BEAR ON KIDNAPPING CASE

Deep interest is displayed by the authorities in the whereabouts of an Italian family who on Tuesday suddenly left their farm, half a mile from New Gretna. Their departure was so sudden that the only preparations made prior to their leaving was to ask a neighbor, Charles P. Kramer, to look after their farm. With him they left their forwarding address as 253 West Forty-fourth street, New York city. Their crops are unharvested and some livestock is on the farm.

The family is named Ligouri and consists of three brothers, their wives and two children, one four months old and the other eighteen months old. Two of the wives are said to be Italian, the other is believed to be of Irish extraction.

Mother Is Dead

Reads of perspiration came out on the man's forehead. He tried to speak but he could only move his lips. He shook his head in negation.

"Is she dead?" Mechanically Pasquale nodded his head.

"Do you ever expect to die yourself?" came the next question from Mrs. Foster.

Pasquale managed to find his voice. "We must all die some time," the suspect muttered.

"Then if you love your mother, if you have any pity for that poor mother in Norristown whose baby you stole, if you ever have any hope of forgiveness for your sins, tell us then what you did with the baby," the woman continued.

The suspect turned ashen under his saltness. He wet his lips with his tongue.

"I no see the baby," he answered, "Joe," he heaved the baby.

"Don't pay any attention to what he says," a detective reminded Mrs. Foster. "He's a liar. He never told the truth in his whole life."

"I believe you killed the baby," Mrs. Foster concluded. "A little bit of an innocent baby. Maybe it smiled as you crushed its life out."

same age and appearance as the Coughlin infant. At that moment the woman who was carrying it turned the baby's head to conceal it. Mrs. Bergen said she thought the circumstance peculiar, and she and her husband discussed it. Captain Souder, it is known, attaches considerable importance to the incident.

The story was told Captain Souder on Monday night, and it was one of the things that prompted him to set out immediately upon his search.

"You have been lying to us long where the baby is being concealed; things are going mighty hard with you," Assistant District Attorney Hendricks is preparing information to swear out before Magistrate Clark, of Norristown, with a view to holding Pasquale for the grand jury's action in the next term of criminal court in Norristown, September 13.

CAMPAIGN BY AIR FOR DRYS

Nominees After Notification Decide to Tour Country by Plane

Germantown, O., Aug. 12.—Before an enthusiastic crowd of neighbors, admirers and party adherents that overflowed the athletic field at Miami Military Institute here last night, the Rev. Aaron S. Watkins, standard bearer of the Prohibition party, and D. Leigh Colvin, his running mate, formally accepted their nominations, both asserting enforcement of prohibition laws and especially the Volstead act, are vital issues of the campaign.

"To us the supreme question of the year is not equal suffrage, the League of Nations, labor, Mexico or Armenia, nor any of the minor questions on which all agree, but the entire extinction of the liquor traffic," said the Rev. Mr. Watkins in his acceptance speech.

"Notwithstanding that we have prohibition in the constitution both political party conventions have refused to assume the responsibility for the maintenance of the Volstead enforcement law without which the constitutional amendment is impotent," declared Mr. Colvin.

Find Abandoned Auto in Woods

Atlantic City, Aug. 12.—A real "mystery motor" was discovered by chance yesterday by a berry picker in a short distance from the old Woods road, a now seldom-used highway paralleling the Mays Landing-Pleasantville boulevard, near the former place. Everything which might have helped to identify the owner of the machine had been removed, and even the upholstery had been burned.

Romig Is Evasive in Bergdoll Trial

Continued from Page One

of the draft in Pennsylvania, was called. He gave virtually the same testimony as General Beary, corroborating that officer in testimony that the United States and Germany have not yet formally entered into a peace pact.

Fifteen years in the sentence Lieutenant Colonel Cresson is expected to ask for Erwin.

Colonel Cresson preferred not to discuss the matter, but the probable length of the sentence to be asked was ascertained by an officer in active connection with the prosecution.

Prosecution Ends Today

"You can say for me that I will ask that Erwin be given a nice long rest where Uncle Sam can find him any time he wants," Colonel Cresson said. He would not deny that fifteen years would be his request.

Bergdoll is being tried in Corbin Hall, in the same room where Grover Bergdoll, his brother, was tried for a similar offense, found guilty and sentenced to five years.

Colonel Cresson will wind up the prosecution today, probably early this afternoon. Frank D. Beary, adjutant general of Pennsylvania; Major William M. Burdick, draft director there, and E. Herbert, General Beary's clerk, will testify.

At Hall, close family connection, will make his evidence interesting. Colonel Cresson, however, has warned him that any admissions made here may be used as grounds for proceedings against him.

"Don't think I like you because I subpoenaed you for the prosecution," he warned him, "because I don't. You want to wait your P's and Q's or your testimony may result in your arrest."

Colonel Gullion, department judge advocate, to whom Bergdoll surrendered, testified as to the actual surrender.

Captain Hoover, has signified his intention of putting up a defense, but it will have to be extremely good to free

Erwin from the ensnaring mesh of evidence constructed by Colonel Cresson and his associates, Captain Robert E. Hanna, and Lieutenant Thomas L. Hefferman.

Year's Record of Railway Institution Shows Big Improvement

Trenton, Aug. 12.—Contrary to a belief expressed in the previous year's report there were but two escapes of inmates from the Railway reformatory during the year ending June 30, although 455 boys were engaged in outside work with but little supervision. One of the two fugitives was recaptured. This was shown in the twentieth annual report of the board of managers and superintendent, Dr. Frank Moore, filed with Commissioner Lewis, of the Department of Institutions and Agencies. There were twenty escapes last year, which was a record-breaker, the highest previous number being twelve.

Special Easy Terms and Free Demonstration on the Hoover Sweeper

\$6.25 places one of the well-known Hoover cleaners in your home during this August sale—and the balance is payable at the very convenient rate of \$6.20 per month. Price of cleaner is \$68.25—\$65 for cash.

As an added inducement, we offer a free demonstration of the Hoover in your own home.

Telephone Walnut 4700 To place your order or request demonstration.

ISKO Electric Refrigeration. 10° to 15° colder than ice. If you had Isko, your present refrigerator would be 10 degrees to 15 degrees colder than ice now keeps it. And what would that mean to you? You would have no more sour cream, no more spoiled foods, no more illness so often caused, unknown to you, by bacteria developed because of insufficient refrigeration. Isko, the electric cold maker, is the up-to-the-minute scientific method of home refrigeration. Without attention from you, it constantly maintains a temperature in which foods remain sweet and healthful indefinitely. It makes ice for table use from pure water. And its cost to run is less than you now pay for ice. Isko can be quickly and neatly attached to your present refrigerator, if it is a good one. If not, we shall be glad to show you the famous Jewett Solid Porcelain Refrigerator here in our show rooms. Domestic Utilities Co. 1717 Chestnut St., Philadelphia

Never a corn on millions of feet nowadays. Do you know that
